

Md Ashik Miah

Block #C, Banasree, Dhaka, Bangladesh | [+8801954025884](tel:+8801954025884)

ashik3232himu@gmail.com | <https://github.com/ConstantineAshik>

PROFESSIONAL SUMMARY

CSE graduate from East West University, specializing in Intelligence Systems and Data Science, with hands-on experience in full-stack software development, machine learning, and database-driven applications. Knowledge of JavaScript, TypeScript, React, Node.js, Express.js, Python, SQL, and modern web technologies, with practical experience developing responsive web applications, REST APIs, authentication systems, and intelligent software solutions. Strong foundation in data structures, problem-solving, machine learning, and data analysis. Seeking an entry-level Software Engineer, Full-Stack Developer, Backend Developer, or AI Engineer role where I can contribute, learn, and grow while building practical software products.

EDUCATION

East West University | *B.Sc. in Computer Science and Engineering - Dhaka, Bangladesh*

Graduated

Major: Intelligence Systems and Data Science

Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Database Systems, Web Development, Computer Networks, Software Project Management, Artificial Intelligence

Skills

Languages: JavaScript, TypeScript, Python, Java, SQL, PHP, C++, Python, Java, SQL, Pandas, NumPy, Scikit-learn, TensorFlow, Keras,

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, EJS, Three.js, Framer Motion

Backend & APIs: Node.js, Express.js, Flask, FastAPI, authentication, validation

Databases & Cloud: MySQL/MariaDB, PostgreSQL, Microsoft SQL Server, Firebase, Supabase

Tools & Practices: Git/GitHub, Docker, Linux, VS Code, Android Studio, testing, secure web development

Languages

- Bangla – Native
- English – Intermediate
- Urdu/Hindi- Conversational

EXPERIENCE

Grameen Communications | *Software Development Intern - Dhaka, Bangladesh*

Jun 2026 - Present

- Contributing to the modernization and migration of the company's public website using Node.js, Express.js, EJS, JavaScript, CSS, and MariaDB.

Research & Publications

E-commerce Conversion Rates and Customer Satisfaction through Neural Collaborative Filtering Recommendations | Research Project

- **Tools Used:** Python, TensorFlow, Keras, Pandas, Scikit-learn
- E-commerce Conversion Rates via Neural Collaborative Filtering (Presented: CIIR 2025) Developed and presented a novel recommendation model to enhance e-commerce conversion rates.
- Certification: https://drive.google.com/file/d/1UcUEPir7t3wg4ZYeQkNTW_zY6mLcHiLk/view?usp=sharing

GuavaNet-XAI: A CNN-Based Framework for Accurate and Interpretable Diagnosis of Guava Diseases
(Under Review)

- **Tools Used:** Python, TensorFlow, Keras, Pandas, Scikit-learn, Grad-CAM
- Evaluated multiple deep learning architectures (including DenseNet-201, EfficientNetV2, ResNeXt) to identify the optimal model for classifying guava diseases from images.
- Utilized **Grad-CAM (Explainable AI)** to interpret model decisions, visually confirming that the network accurately focused on disease symptoms on leaves and fruits.
- Authored the research paper, "GuavaNet-XAI: A CNN-Based Framework...", which is **under review** at the 28th International Conference on Computer and Information Technology (ICCIT 2025).

Technical Projects

Automated Traffic Risk Assessment: A Computer Vision-Based Analysis of Motorcycle Riding Behavior in Dhaka | Final Capstone Project

- Tools Used: Python, YOLOv8, OpenCV, Scikit-learn, Gradio
- Built a computer vision pipeline to analyze rider-perspective motorcycle videos from Dhaka using YOLOv8 object detection, optical flow, and rule-based risk heuristics.
- Engineered risk features include proximity, time-to-collision trends, blind spots, side cut-ins, wrong-side approaches, nighttime/wet-road conditions, and phone distraction to classify rides into SAFE, CAUTION, and DANGER.

Enterprise Database Change Intelligence Platform | *Architecture and documentation phase* | [GitHub](#)

- Designed a documented monorepo architecture with a Next.js 14/TypeScript desktop app, React Native mobile app, FastAPI service, ASP.NET Core SQL gateway, PostgreSQL, Neo4j, Redis, Docker, human approval, dry runs, RBAC, and audit trails.

Grameen Communications Website Modernization

GitHub: <https://github.com/ConstantineAshik/grameen-communications>

Technologies: Node.js, Express.js, EJS, JavaScript, CSS, MariaDB, Hugging Face Transformers

- Migrated a legacy corporate website into a modern Node.js and Express.js application while preserving existing content, routes, uploaded media, and database records.
- Implemented middleware for compression, security headers, rate limiting, request validation, sanitization, and safe file uploads.

Swoosh Shop Platform

E-Commerce Project

GitHub: <https://github.com/scarface-h/swoosh>

Technologies: React 19, TypeScript, Vite, Tailwind CSS, Node.js, Express.js, Prisma, MySQL/TiDB, Redis, Docker, Nginx

- Contributed to a production-oriented monorepo containing a customer storefront, protected administration dashboard, backend REST API, and shared TypeScript packages.
- Worked with storefront features including product browsing, categories, product details, shopping cart, wishlist, collections, checkout, and contact pages.
- Worked with administration modules for products, catalogue management, orders, customers, reviews, promotions, administrator accounts, settings, and help-desk requests.
- Supported backend functionality for authentication, product catalogue management, variant inventory, pricing, checkout, orders, administrative RBAC, uploads, notifications, and audit history.

Online Voting System | Academic Project

- **Tools Used:** PHP, JavaScript, HTML, CSS, MySQL
- Developed a secure web-based platform for conducting online elections.
- Implemented features for user registration, authentication, ballot casting, and real-time result tabulation.
- Ensured data integrity and prevented multiple votes through backend validation and database management.

Leadership & Extracurricular Activities

EWU Robotics Club (EWURC), East West University

General Secretary | 2023 – 2024

- Successfully Organized EWU National Robofest
- Trained and mentored 50+ junior members in "Kickstart to Robotics 2.0 & 3.0" workshops.

Volunteer Coordinator | 2022 – 2023

- Recruited, trained, and managed a corps of 100+ volunteers for club activities.
- Organized Robotics Segment for EWU CSE FEST 2024
